PROFILE

DevOps-focused engineer with hands-on skills in Linux systems, cloud platforms (AWS/Azure/GCP), and CI/CD automation. Passionate about building reliable, automated, and secure infrastructure — comfortable working across the stack where infra meets code.

SKILLS

Languages	Python, Java, C
Framework & Libraries	React, Next.js
Databases	PostgreSQL, MongoDB
Infrastructure	AWS (EC2, S3, Lambda), Google Cloud , Azure , Vercel
Systems	Linux, Git, Bash, Docker, Jenkins
AI-Assisted Development	GitHub Copilot, Claude Code, Opencode, Antigravity

PROJECTS

ArcadeVerse — *React, Tailwind CSS, Axios, Cheerio, Vercel* [GitHub](#) | [Live](#)

- Built a full-stack web application that scrapes Google Cloud SkillBoost profiles, classifies earned badges, and automatically calculates Arcade points using custom scoring and milestone rules.
- Developed TypeScript/Express and serverless API endpoints with Axios and Cheerio for profile extraction, badge normalization, fuzzy matching, deduplication, and structured point calculation.
- Implemented React Context-based profile, calculation, and leaderboard management with localStorage persistence and deployed the application using Vercel

Guardian AI — *FastAPI, PostgreSQL, React, PyTorch, WebSockets* [GitHub](#) | [Live](#)

- Developed a modular platform for detecting online grooming by integrating speech-to-text, transformer-based text classification, LLM-assisted analysis, and real-time alerting.
- Designed an asynchronous backend architecture using FastAPI, PostgreSQL, WebSockets, and background task processing to coordinate ML pipelines and real-time alerts.

QuizGenAI — *FastAPI, PostgreSQL, SQLAlchemy, React* [GitHub](#) | [Live](#)

- Developed backend services for an AI-powered quiz platform supporting authentication, quiz generation, answer evaluation, and leaderboard management.
- Built a modular FastAPI architecture integrating PostgreSQL, SQLAlchemy, shared API contracts, and LLM services for structured content generation.

EDUCATION

Bachelor of Engineering in Computer Science and Design [Expected 2027](#)

KS Institute of Technology, Bengaluru
CGPA: **8.21/10.0** (through Semester 6)

ACHIEVEMENTS

- Secured **Second Place** at the **National Level Hire-4-Thon Hackathon (2026)**.
- Interests: Playing guitar , Reading, journaling, and exploring emerging technologies.
