PROFILE

Cloud & DevOps enthusiast with hands-on experience in Linux, AWS, Azure, GCP, Docker, and CI/CD automation. Interested in cloud infrastructure, automation, and building reliable, scalable systems.

EDUCATION

Bachelor of Engineering in Computer Science and Design — **Expected 2027**
KS Institute of Technology, Bengaluru — CGPA: 8.21 (through Semester 6)

SKILLS

Languages	Python, Java, C
Fundamentals	DSA, OOP, DBMS, Operating Systems, Computer Networks
Framework & Libraries	FastAPI, SQLAlchemy, Pydantic, React, Next.js, Express.js
Databases	PostgreSQL, MongoDB
Infrastructure	AWS (EC2, S3, Lambda), Google Cloud, Azure, Docker, Kubernetes
DevOps & Tools	Linux, Git, GitHub, Bash, Jenkins, CI/CD, Vercel

PROJECTS

ArcadeVerse — *React, TypeScript, Tailwind CSS, Express.js, Axios, Cheerio, Vercel* GitHub | Live

- Built a full-stack web application that scrapes Google Cloud SkillBoost profiles, classifies earned badges, and automatically calculates Arcade points using custom scoring and milestone rules.
- Developed API endpoints for profile extraction, badge normalization, fuzzy matching, and deduplication; implemented profile tracking and leaderboard functionality.

CodeBrain — *React, Python, AI/LLMs, Supabase, GitHub Actions* GitHub | Live

- Developed an AI-powered codebase understanding assistant that analyzes repositories to provide code explanations, contextual Q&A, and automated documentation.
- Designed repository ingestion and code-analysis workflows with AI-powered documentation generation, code assistance, and CI/CD deployment integration.

Guardian AI — *FastAPI, PostgreSQL, React, PyTorch, WebSockets* GitHub | Live

- Developed an AI-assisted platform for detecting potential online grooming through speech-to-text processing, transformer-based text classification, LLM-assisted analysis and real-time alerting.
- Designed an asynchronous backend using FastAPI, PostgreSQL, WebSockets, and background tasks to coordinate detection workflows and real-time alerts.

QuizGenAI — *FastAPI, PostgreSQL, SQLAlchemy, React, LLMs* GitHub | Live

- Developed an AI-powered quiz platform supporting user authentication, automated quiz generation, answer evaluation, and leaderboard management.
- Built modular backend services using FastAPI and SQLAlchemy, integrating PostgreSQL and LLM services for structured quiz content generation.

ACHIEVEMENTS & INTERESTS

- Secured **Second Place** at the **National Level Hire-4-Thon Hackathon (2026)**.
- Interests: Playing guitar, reading, journaling, and exploring emerging technologies.
